

## Item 52719

The Minimax Two Part floor drain has a 50 mm side outlet and a total height of 89mm. It is designed as a two-part system for ease of installation in former trays, when using wooden joists. It is also suitable for installation in concrete joists. The Minimax Two Part floor drain comes complete with a removable NOOD water trap, clamping ring, 50 mm to 1½" adapter for solvent weld and plastic grate for vinyl flooring. The NOOD water trap is a mechanical trap which closes when there is no water present, thus preventing any foul air from escaping through the drain. The floor drain is suitable for vinyl, tiled and resin flooring. Grates for tiled and resin floors are ordered separately.

## Specifications
