

## Item 8037905

Purus' V55 Plaster Separators are designed to stop the deposition of substances such as plaster and sand, which are often flushed through the outlet and block the sewer pipe. These are usually placed in connection with stainless steel workbenches and laundry chutes. Solid particles are separated from the water and are held back in the bottom of the bucket, which can then be removed for emptying and cleaning. The V55 Plaster Separators are often used in hospitals, dental surgeries, art facilities, art colleges and universities.

## Specifications

<b>Item Number</b>	8037905
<b>Electrical Data</b>	13 l
<b>Function</b>	Console mounting
<b>Item Color</b>	Stainless
<b>Material</b>	PP, EPDM, Stainless steel 1.4301
<b>Outlet Dimension</b>	G40
<b>Pressure Flow Temp</b>	1,5 l/s
<b>Size</b>	360x370x430 mm
<b>Surface</b>	Polished
<b>Version</b>	Internal x external thread
