PURUS

Item 818182

Purus channel volume for tile floors with glue flange is a floor channel made of acidresistant stainless steel for installation in concrete. The floor channel is 400x400x100 mm med ett mittplacerat utlopp och är avsedd för klinkergolv som ytskikt. The floor channel needs to be supplemented with grid depending on the environment and outlet house in acid-resistant stainless steel. Purus channel volume is adapted for environments with requirements for hygiene, has a large volume and high flow capacity.

Item 818183

Purus channel volume for tile floors with glue flange is a floor channel made of acidresistant stainless steel for installation in concrete. The floor channel is 600x400x100 mm med ett mittplacerat utlopp och är avsedd för klinkergolv som ytskikt. The floor channel needs to be supplemented with grid depending on the environment and outlet house in acid-resistant stainless steel. Purus channel volume is adapted for environments with requirements for hygiene, has a large volume and high flow capacity.

Item 818184

Purus channel volume for tile floors with glue flange is a floor channel made of acidresistant stainless steel for installation in concrete. The floor channel is 900x600x100 mm with a mid outlet and is intended for tiled flooring. The floor channel needs to be supplemented with grid depending on the environment and outlet house in acidresistant stainless steel. Purus channel

volume is adapted for environments with requirements for hygiene, has a large volume and high flow capacity.

Item 818185

Purus channel volume for tile floors with glue flange is a floor channel made of acidresistant stainless steel for installation in concrete. The floor channel is 800x500x100 mm with a mid outlet and is intended for tiled flooring. The floor channel needs to be supplemented with grid depending on the environment and outlet house in acidresistant stainless steel. Purus channel volume is adapted for environments with requirements for hygiene, has a large volume and high flow capacity.

Item 818154

Purus channel volume for tile floors with glue flange is a floor channel made of acidresistant stainless steel for installation in concrete. The floor channel is 500x300x50 mm with a mid outlet and is intended for tiled flooring. The floor channel needs to be supplemented with grid depending on the environment and outlet house in acidresistant stainless steel. Purus channel volume is adapted for environments with requirements for hygiene, has a large volume and high flow capacity.

Item 818187

Purus channel volume for tile floors with glue flange is a floor channel made of acid-resistant stainless steel for installation in concrete. The floor channel is 300x300x200 mm with a mid outlet and is intended for tiled flooring. The floor channel needs to be

supplemented with grid depending on the environment and outlet house in acid-resistant stainless steel. Purus channel volume is adapted for environments with requirements for hygiene, has a large volume and high flow capacity.

Item 818188

Purus channel volume for tile floors with glue flange is a floor channel made of acidresistant stainless steel for installation in concrete. The floor channel is 500x300x200 mm with a mid outlet and is intended for tiled flooring. The floor channel needs to be supplemented with grid depending on the environment and outlet house in acidresistant stainless steel. Purus channel volume is adapted for environments with requirements for hygiene, has a large volume and high flow capacity.

Item 818189

Purus channel volume for tile floors with glue flange is a floor channel made of acidresistant stainless steel for installation in concrete. The floor channel is 800x500x200 mm with a mid outlet and is intended for tiled flooring. The floor channel needs to be supplemented with grid depending on the environment and outlet house in acidresistant stainless steel. Purus channel volume is adapted for environments with requirements for hygiene, has a large volume and high flow capacity.

Item 818192

Purus channel volume for tile floors with glue flange is a floor channel made of acidresistant stainless steel for installation in

concrete. The floor channel is 1000x300x50 mm with a mid outlet and is intended for tiled flooring. The floor channel needs to be supplemented with grid depending on the environment and outlet house in acidresistant stainless steel. Purus channel volume is adapted for environments with requirements for hygiene, has a large volume and high flow capacity.

Item 818193

Purus channel volume for tile floors with glue flange is a floor channel made of acidresistant stainless steel for installation in concrete. The floor channel is 1200x600x100 mm with a mid outlet and is intended for tiled flooring. The floor channel needs to be supplemented with grid depending on the environment and outlet house in acid-resistant stainless steel. Purus channel volume is adapted for environments with requirements for hygiene, has a large volume and high flow capacity.

Specifications

Size	400x400x100	
Item Number	818182	
Floor Construction	Concrete flooring	
Material	Acid-resistant stainless steel 1.4404	
Floor Covering	Tile floor with glueing flange	
Construction Height	110	
Surface	Pickled	

Do not forget grid/outlet house Version **Item Color Stainless Outlet Dimension** Side/bottom in stainless steel in Ø75/Ø110 mm **Function** Central outlet **Electrical Data** 15 I Size 600x400x100 **Item Number** 818183 **Floor** Concrete flooring Construction **Material** Acid-resistant stainless steel 1.4404 **Floor Covering** Tile floor with glueing flange Construction 110 Height **Surface** Pickled Do not forget grid/outlet house Version **Item Color Stainless Outlet Dimension** Side/bottom in stainless steel in Ø75/Ø110 mm **Function** Central outlet **Electrical Data** 23 I
