

## Item 05701

The rubber protective strip is used as a protective cover for Purus' channels for resin floors. The cover ensures that concrete does not run into the resin flange when pouring. Suitable for resin channels in all ranges.

## Item 05702

The rubber protective strip is used as a protective cover for Purus' channels for resin floors. The cover ensures that concrete does not run into the resin flange when pouring. Suitable for resin channels in all ranges.
