

Item 07165

Sediment trap in acid-resistant stainless steel with a volume of 1.3 litres, designed to fit the Big and Heavy floor gullies, as well as the Kitchen Channels when used with an extension ring. Sediment traps are used to collect smaller particles which are heavier than water, such as sand and gravel. The particles collect in the trap, which can then be removed for emptying and cleaning.

Specifications

Item Number	07165
Flow	4,0
Function	For Ø220 mm drains
Item Color	Stainless
Material	Acid-resistant stainless steel 1.4404
Surface	Pickled
